ABOUT ME

Nickname : Nutt

Date of Birth : October 3,2002

Ages : 21

Nationality : Thai

COURSE ACTIVITIES

Mini Project

Autodust Bin

- It is a trash can that can be opened and closed automatically with a sensor or by pressing a command from the dashboard. The bin capacity can be displayed as a percentage on the LCD screen. When the trash can is full, it will display 'MAX' on the screen and send a notification to LINE.

Twitty

- Twitty is a website with a UI similar to Twitter. You can create an account, edit your profile, and log in. You can post content and comment. You can follow accounts, press 'LIKE,' and view the posts of people you follow.

Airport Database

- This is my database design from second years. I create and design databases for airports. This database stores all airport information such as aircraft information. Airport information, ticket information, customer information, etc.

INTERSHIP

- Web Developer
- Software Engineer
- Software Tester
- UX/UI

Period of time

22 April - 21 June 2024
